The Broad and Shared Strategies of Queensland's PHC RED Training Needs

Lisa Crossland – James Cook University, Townsville
*Stephanie De La Rue – Mount Isa Centre for
Rural and Remote Health*
*Lily Cheung – The University of Queensland,
Brisbane*
Denise Schultz – Statewide Coordinator

PHC RED Queensland
Primary Health Care Research
Evaluation & Development

What we do

- Workshops in:
 - Evidence-based practice
 - Planning and evaluation for Divisions of General Practice and allied health organisations
 - Training in qualitative & quantitative research
- Funding support for primary health care professionals wishing to undertake research
- A developing network of primary health care researchers Queensland-wide
- Research capacity building for Aboriginal Medical Services

PHC RED Queensland
Primary Health Care Research
Evaluation & Development

Challenges Faced

- Distance and remoteness:
 - Resourcing in remote areas
 - Delivery of capacity building strategies
- Catering to an increasing range of expertise
- Linking researchers to formal ongoing education training and support
- Ongoing sustainability of capacity building activities

Solutions & Directions

- Strategic use of Tripartite member specialities
- Research Network: Federation Model
- Research capacity building road show
- Develop Tripartite corporate memory:
 - Web based training modules
 - Web based research resources
- Targeted capacity building for identified groups
academic general practice, allied health, and
Aboriginal Medical Services
